

Small Schools

Small Schools are individualized schools located within the Amelia and Glen Este high schools. They allow students to focus on a primary area of study. Please look over these descriptions of our small schools with your student and determine which one they would like to attend.

Registration cannot be completed until a small school is chosen.

Please circle your student's choice of school.

Amelia High School Campus

School of Business and Technology

Student and teacher work in the School of Business and Technology resembles that of many companies using structures and quality practices of the 21st century corporations.

Students explore their interests through working with businesses in the community, region and at the international level while mastering academic subjects.

Technology becomes a tool for learning and communications as part of the student's daily routine.

International Baccalaureate School

An internationally standardized program of rigorous studies in traditional areas of coursework characterizes the International Baccalaureate School.

The program challenges and meets the needs of highly motivated, academically oriented students.

Math, Science and Technology Academy

The Math, Science and Technology Academy helps students develop the ability to test ideas and theories through the study of physics, engineering and industrial technology.

Although mathematics and science form the core of studies in the school, students meet or exceed all district academic standards in all core subjects.

School for World Studies

The School for World Studies provides students with opportunities to study politics, social change and economic development from a global perspective.

Through four years of study, students experience in-depth study of the languages, social changes, economic development and cultures of a variety of nations around the globe.

Glen Este High School Campus

School of American Studies

The School of American Studies has partnered with the Gilder Lehrman Institute to give students an in-depth study of American history and culture.

The program focuses on students' interests in history, government, politics, current issues and other social sciences while connecting to the core academic subjects to provide a solid liberal arts foundation.

School of Communications and Technology

The School of Communications and Technology focuses on student interest in communications and technology, emphasizing broadcasting, visual arts, writing, journalism, yearbook, speech, and programming.

Students develop their interest in specific areas of communications and technology while mastering core academic subjects.

School for Scientific Studies

The School for Scientific Studies encourages students to approach learning with a scientific perspective while meeting all academic standards.

Field research and lab work are integral parts of student life with opportunities to study at the local, regional and national level.

West Clermont Institute of Performing Arts

The West Clermont Institute of Performing Arts provides opportunities for students to develop their talents and interests in the performing arts while mastering district academic standards.

An outreach program provides increased opportunities to perform in the community and region.
