

Attention All Parents /Guardians of Current 6th Grade Students

Immunization Requirements for school attendance in Ohio have changed!

All students entering the 7th grade in the fall are now required by Ohio school law to provide proof of the following immunizations BEFORE starting school:

- TDap (to protect from Tetnus, Diptheria and Pertussus)
- Meningococcal (MCV4) (to protect from Meningitis)

Any student who has not had the TDap and Meningococcal (MCV4) vaccination prior to entering the 7

th

grade will not be permitted to attend school until proof of these immunizations has been received by the school.

Both of the required immunizations, TDap and Meningococcal (MCV4) can be obtained at any time. We encourage you to contact your physician or the Clermont County General Health District at 513-735-8400 to schedule an appointment now.

Don't wait!! Clinics tend to become very busy towards the end of the summer causing a delay in immunization which could result in your child's exclusion from school.

Please provide proof of these immunizations as soon as possible to the school by either sending in with your student or faxing (by you or your physician) to 513-753-3462, Attn: Health Clinic.

Please return this documentation

Student Name _____ Date of Birth _____

Tdap received on _____

Meningococcal (MCV4) received on _____

Signature of Vaccine Provider _____

Provider Printed Name _____ Phone _____

Provider Address _____
